

Amazing New EVA Interlayer Film for Laminated Glass

CNCGLASS.com

Jade White EVA Interlayer

- Jade White EVA Interlayer Film 2 Type:
- -Cool White EVA Film
- 82.2% Visible Light Transmittance
- -Arctic Snow EVA Film
- 69.8% Visible Light Transmittance

Jade White EVA Interlayer Advantages

- **Amazing Visual Effect**
- **99%UV Blocked**
- **Can be Used in Outdoor Environment, best Aging-Resistance**
- **Great Mechanical Properties:Geat Tensile Strength, Strong Adhesive Strength to glass, Aluminum, PET, PMMA, Impact Resistance, High Hardness after Cross link, Strong humidity and heat resistance, Good stability after long storage.**

Jade White EVA Interlayer Advantages

- **First EVA Interlayer Type in the World**
- **More Light Transmittance but Better Privacy Retained**
- **The combinations of glass with Jade White EVA Film can provide security, safety, solar control, energy efficiency, strength, decoration and special make-ups.**
- **Best Choice for Shower Door, Curtain Wall, Room Portion, Decoration, Privacy Separation, overhead canopies, balustrades, glazed areas around gymnasiums, pool fences, special doors, partitions or feature panels and glass for cyclone areas.**

Jade White EVA Interlayer Advantages

- Best choice to laminate with decorative layers to make various laminated glass designs. Decorative glass can be combined with imprinted PET film
- Open edges exposed to the weather can be laminated with Jade White EVA Film
- Perforated steel Glass can also be laminated with perforated steel reinforcement material.
- The same mechanical properties like BRIDGESTONE EVASAFE interlayer.
